Genetic breed identification:
Labrador Retriever

Predicted adult weight: **61 lbs**
Calculated from 17 size genes.

Breed ancestry:

Labrador Retriever: 100.0%

Health Report

How to interpret Mae's genetic health results:

If Mae inherited any of the variants that we tested, they will be listed at the top of the Health Report section, along with a description of how to interpret this result. We also include all of the variants that we tested Mae for that we did not detect the risk variant for.

A genetic test is not a diagnosis

This genetic test does not diagnose a disease. Please talk to your vet about your dog's genetic results, or if you think that your pet may have a health condition or disease.

Summary

Mae is not at increased risk for the genetic health conditions that Embark tests.
